19.- 26. AUG

About

Atelier Emona architectural workshop is an eight day event where we'll be hosting international and local architecture students and young architects who want to learn, network and grow in their fields.

Our Workshops provide a melting pot of cultural and continental thoughts and challenge us all on a week of in-depth analysis and research that brings thoughtful, daring, and innovative solutions.

When dealing with complex architectural and urban questions, we believe our answers will be more profound by understanding the vast extent of architectural influence and the varieties of design through cultures. With this in mind, we are inspired to bring together architectural minds from different parts of the world to discuss the social problems of the cities workshops are held at.

- 100 Young Architects
