

„RECONSTRUCTION AND ORGANIZATION OF PUBLIC FACILITIES (SPACE) WITH DIVERSE PROGRAM,,

This area /topic/ finds its justification in understanding that it is not always realistic to expect and will be able to operate the new facilities constructed locations.

Because of this it is always finding the actual work on buildings that do not work or “barely living” so ripe for renewal and re-organization or another, regardless of their position in urban environment.

Specific functional contents, facilities and urban environment will be defined in consultation with the candidate.
