

HOMAGE TO TOGETHERNESS

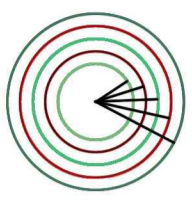

With the world facing a global pandemic we were all put in a position where we have to reevaluate a lot of aspects of our everyday life and especially the social part. This made everyone realize the importance of connection and togetherness.

The word togetherness can have a lot of different meanings depending on the personal opinions. For us it is a composition of smaller fragments working together to create a better place for everyone. A place of belonging and unity.

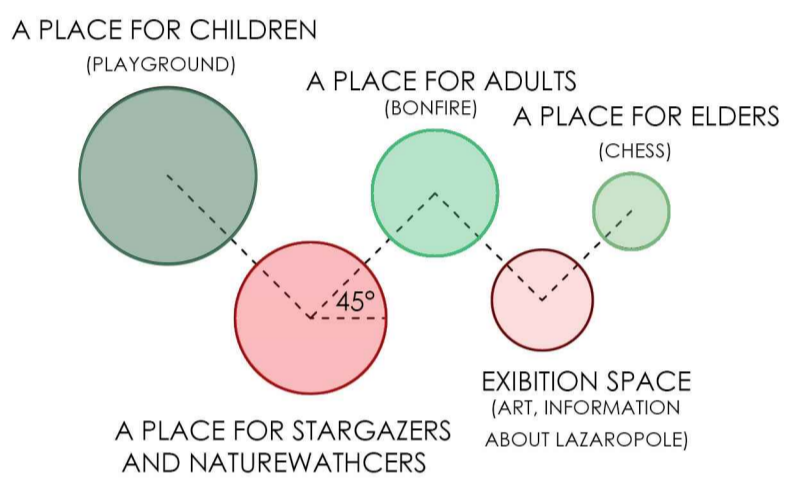

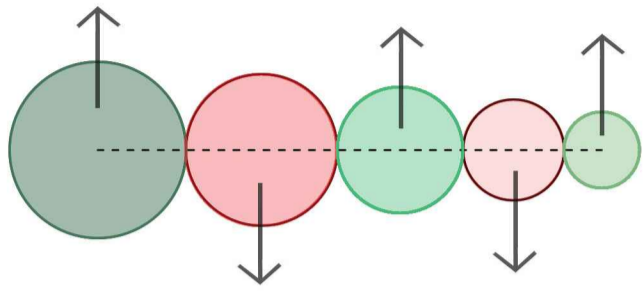

Thinking of that we came up with the idea and the concept of this project. Although the building type and style in Lazaropole is very traditional with compact and rectangular shapes, we decided to use the shape of the circle because it is considered to be the most powerful geometrical form directly associated with unity.

The concept is simple, combined of five individual circles. Each of them is a different size and raised on different height with different use. The tree units close to the street can be accessed from individual stairs, that after are connected with the other two units. This correlates with our understanding of togetherness – INDIVIDUAL PARTS CREATING UNITY

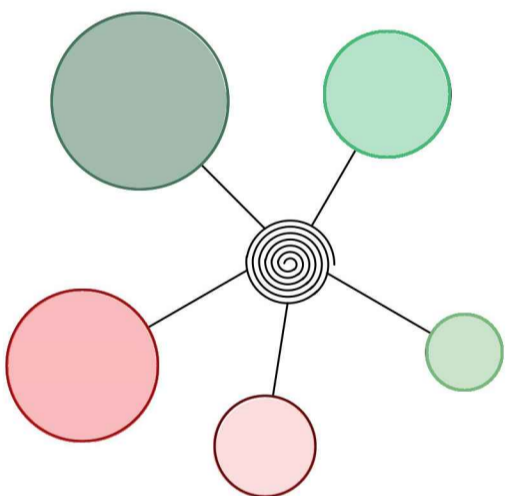

CONCEPT

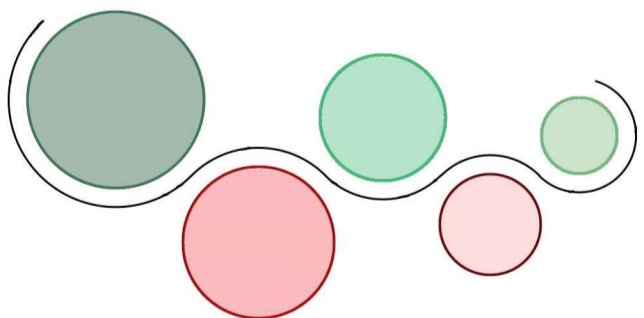

CIRCLE=TOGETHERNESS

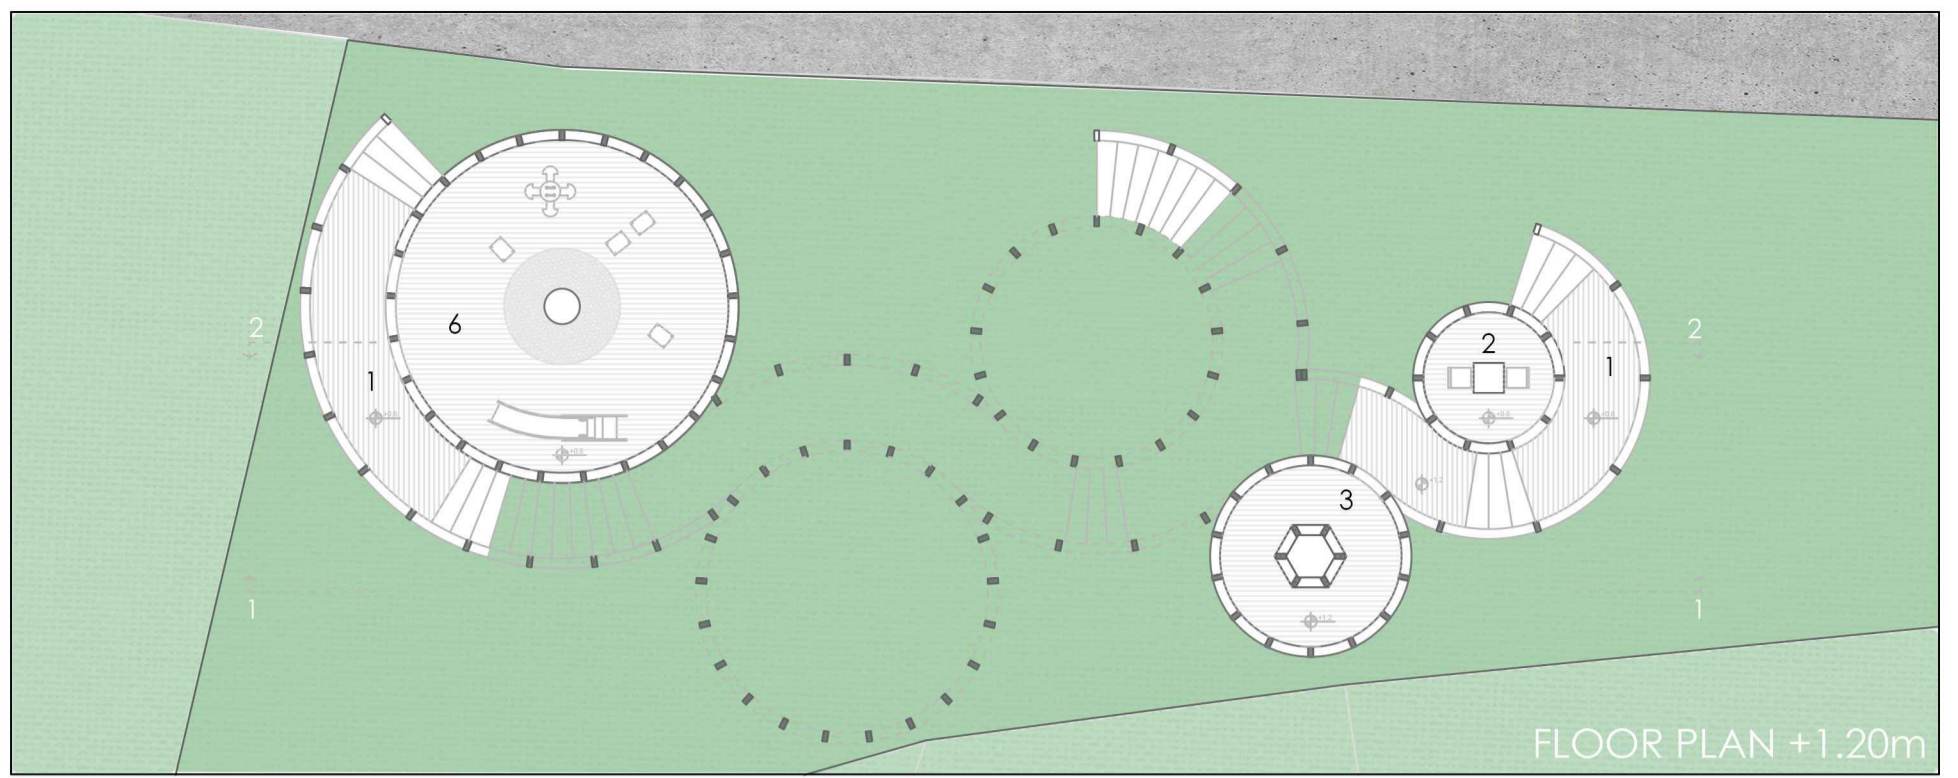

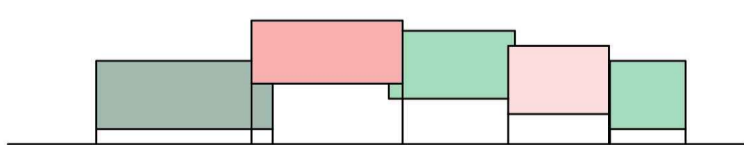

INDIVIDUAL SEGMENTS TO UNITY

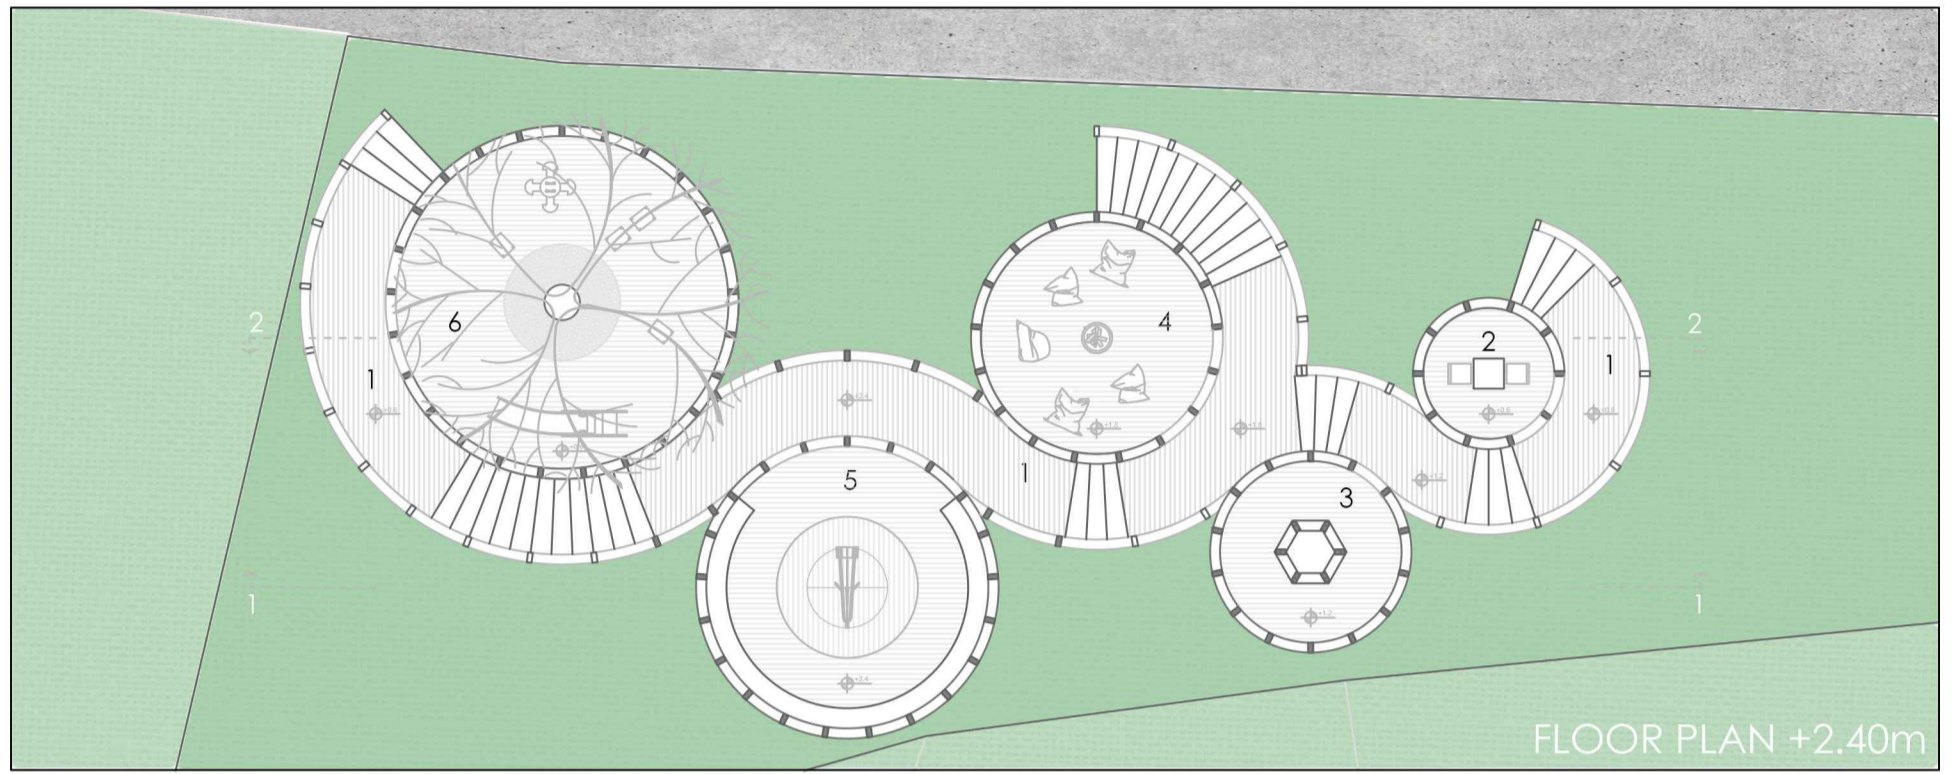

EACH CIRCLE HAS A DIFFERENT USE, BUT THEY ARE CONNECTED TOGETHER THROUGH A PATH.

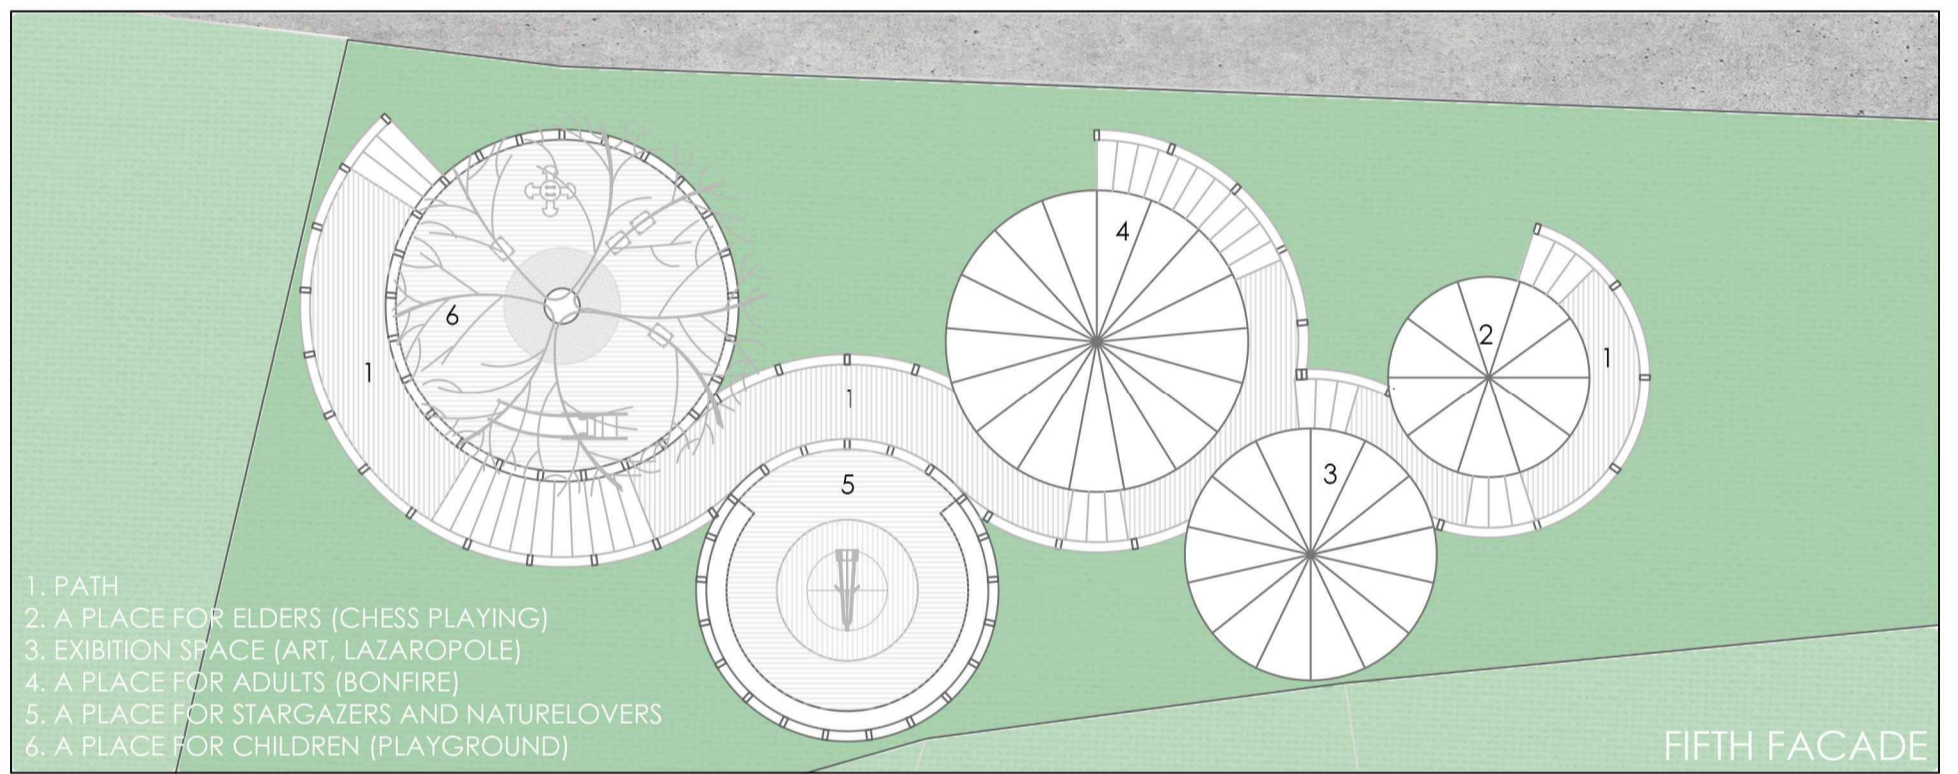

THE DIFFERENT HEIGHTS OF SEGMENTS REPRESENT THE SHAPE OF THE MOUNTAINS
